

Don't Settle for Less... Settle for More

Symmetrical Speeds Up To 1 Gig!

Download Speed: How quickly you can access things on the internet **Upload Speed:** How quickly you can put things on the internet.

At Work and At Home... Symmetrical Connections Are The Future

Symmetrical internet speeds are a huge plus for students, businesses, people that work-from-home, content creators, and gamers, They are able to upload PDF's, large graphic files and videos to the internet to share with clients, coworkers, teachers and students. Since these files tend to be quite large having a faster upload speed saves valuable time.

- For example if you were to upload a 1 GB file and had a 10Mbps upload speed that file would take up to 15 minutes, with a 1 Gig upload speed that file would take 1 second. Imagine the amount of time saved.
- Gamers have a competitive edge with symmetrical speed with less latency and lag time.
- Businesses are able to ensure all of their employees can share files, upload videos, video conference with team members and clients, as well as their daily duty requirements, making their time more productive. Less down time means more quality time.
- Viewing Security/Monitoring Cameras, upload speed matters more than download speed.

Providing symmetrical speed plans is just one of the many items that create separation from Mid Century Fiber and our competitors. In addition to being a local company with local customer service, all of our plans include No Data Caps, No Overage Fees, Free installation within a fiberhood, Mobile App to Manage Your Network and you Lock-in Your Price for Life!*

So don't settle for less from your current internet provider, settle for more with Mid Century Fiber!
